I really don't know what to say other than, it is an experience. A wonderful, tense, pearl clutching, that just happened, experience. I seriously need to play the actual games if this prototype is any indicator of the depth of quality and atmosphere one can expect.. Indescribable game. Best game xd. I do not recommend this game to anyone, this game is about multiplayer but all the servers are offline for years and it will stay that way. I don't understand why they still sell this game.. Very cute, although shorter than I wished. Needs to be continued.. This is most likely not the most fun A2A combat sim ever.. It's what would happen if someone tried to make DOOM (2016) by themselves and for the most part succeeded. It's worth every penny and then some of the \$0.49 I spent.

Controls are a little funky, and when playing the shaman and using the speed boost spell, you can barely run properly. Simple, short, fun. Worth the price. I love it.. I really appreciate alpha games and I'm fully aware of what I might be getting into when I sign on any dotted line with a purchase. I'm a big dungeon crawler fan and watched a few of "Deadman's" videos on YouTube before buying this game. (He'd been playing the game since release on steam). As mentioned by others in these reviews, its very, very early stage....but let me tell you they're on to something. If Gauntlet, Gauntlet Legends, Heretic, Hexxen, Diablo and a First Person RPG/Shooter got together and had a child; this would be their offspring. The simple fact its first person is a game changer; not to mention you can play with friends on the fly! The dungeons can be randomly generated and it's a complete loot fest. Well worth the few dollars it costs. (We've all spent more at the movies and had nothing to show for it the next day, I try to keep that in mind) The foundational graphics engine is solid enough to play as of now. They've revamped the music and a few other aesthetic dynamics. (Devs are very active and friendly) It does have glitches/bugs and needs more content but it's so early stage that the sky is the limit. I definitely see what they're trying to do here. :) If you're into mass looting, hack n' slash and fast upgrades while mobs sneak up behind you and try to lop your head off while you frantically try to aim and kill them then this is the game for you. It starts off slow so don't give up on it; takes some time to ramp up and see what it's worth. I bought it in the middle of the night and couldn't stop playing it. This could be the type of game that leads you to not going to work or skipping school. I have my friends playing it now and I don't want to play anything else at the moment. lol Great job guys. :) The major downfall of this game, due to how early stage it is, is the general lack of content. There are only a handful of levels to randomly generate at the moment. Hope this one works out though, make more content!!!. I had hoped that this game would show some progress but it has seen little attention.

I paid 50 cent for it on sale.

Aside from the lack luster graphics the most annoying part of this game was maintaining basic survival needs. Unlike a human who has a bag and can store food and water you are an animal. Which that is fine provided that you make it easy to find food and water. Also as a player we need more warning to hunger and thirst. By the time I was thirsty it was too late. I could not find water fast enough to survive. Their needs to be more prey in the game and when your wolf is hungry or thirst his wolfy instincts should kick in to help the player find food and water. This could be a glowing path or just an arrow pointing to water. Heck it could be a sent trail for prey.

I have hope for this game but not unless it sees some Dev attention.. Gift of Parthax is a nice little 2D arena game thats great to play if got some time to kill.

The combat can be a bit challenging but at no point unfair or unbalance, as you can customize you spells with different runes before each fight.

The graphic is pretty nice aswell and very fitting for the style of the game and storie.
