Windows 7 systems. One of the greatest advantages of our powerful software lies in the built-in mechanism that allows to protect data even without connecting to a network. Using the built-in, drag-and-drop facilities the user is able to quickly create, access, and manage the scheduled backup tasks. At the same time, the application is highly resistant to all kinds of errors and corruptions. No matter what happens, you will be able to restore all the data in any way you wish. A highly-advanced application, DrvSoft DiskInternals backs up your data in three different ways: - Backup of complete folders to the selected location. - Backup of files and subfolders to the selected location. - Backups of files and subfolders to the network shares (if this option is

---

selected). A built-in mechanism for the automatic backup is also included in DrvSoft DiskInternals. This feature can help you to easily move and send backups. The potential of the application is as large as the amount of data being backed up. By using the powerful built-in utility, you can back up the files in one click, which is not only time-saving but also eliminates the need for disk copying. A unique feature of our program is that it allows you to select the size of the backup. This is a very important feature as it allows you to create only the amount of space you really need to store your data. DrvSoft DiskInternals has the following advantages: - Import and Export allows you to quickly copy the entire content of one folder to another location. - Backups can be scheduled

---

when you wish to automate the process and avoid losing important information. - You can easily restore your data regardless of the size of your backup. - Works on all Windows versions: 95, 98
